Visit to The Airplane Factory concludes AeSSA 2019 Annual Conference

Some 70 delegates paid a visit on Friday, 18 October 2019, to The Airplane Factory, the home of the legendary Sling aircraft, which was hosted by Director Mike Blyth. Blyth took the group through a number of hangars to illustrate the various stages of aircraft design and assembly.

The Airplane Factory produces various aircraft, including the two-seat Sling 2 and the four-seat Sling 4, and sells most of its aircraft overseas. Blyth said, “The quality of our aircraft and the beauty of their design have made us a successful player in the overseas market.” The Airplane Factory even ships out airplanes as kits for enthusiasts to assemble.

The Airplane Factory embodies the theme of the AeSSA 2019 Annual Conference, African Aerospace: Innovation and Passion, and signalled the end of three days of stimulating presentations and productive networking.
